

# Reducing the Risk FOR All of Us

Savannah River Remediation treats and stabilizes the Savannah River Site's legacy nuclear waste, currently stored in large waste tanks. But SRR is also operationally closing these waste tanks, further reducing risk. By closing two waste tanks in 2012 and two more in 2013, we continue to protect our workers, the public and the environment.

Count on us. *We'll Do The Right Thing.*
